Whether it's for a classroom, community center, lake association, or a zoo, our wildlife educators have engaging programs that will fit any occasion - often times with one of our wild ambassador animals. Educational programs are run throughout the year.

## Northwoods Birds of Prey

Meet Tommi, our beautiful glove-trained red-tailed hawk, while learning about the important role raptors play in our environment and the steps we can take to ensure they can live their wild and best and natural lives.

## Turtles of Wisconsin

Turtles maybe slow, but they aren't boring.

Learn the ins and outs of turtles and their many adaptations that

make them so unique! Hold real turtle shells up close, and meet a couple of our resident turtles up close and personal!

## Frogs and Toads of Wisconsin

From eating slugs, snails, beetles, flies, mosquito larvae, frogs, and Toads perform essential ecosystem services for all of us. But it can be hard being a frog or a toad. This program will teach you about their extraordinary lives and how easy it is for us to help them a little.

## Insects of Wisconsin

Discover the fascinating world of insects through this creepy crawly class! Delve into the intricate lives of these remarkable creatures as we

utilize live, yet safe, insects to illustrate their vital roles in the ecosystem. Our hands-on approach encourages exploration and understanding, providing you with a unique opportunity to observe these tiny marvels up close.

## Stories from the Front Lines of Wildlife Rescue and Rehabilitation

The birds and animals we rescue and rehabilitate often have interesting stories that

help us understand how our actions and decisions affect their lives. Using actual video and photography of Northwoods Wildlife Center rehabbers treating and caring for sick, injured, and orphaned animals, learn how you can help them and be a wildlife hero!

## How Birds Raise a Family

Birds are among the best and most dedicated parents in nature. And this program will help you learn about the many different ways birds take raise and care of their babies.

## Other Program Topics

Bald Eagles

Gray Wolves

Beaver Ecology

Northwoods Lake Life

Porcupines

Fun with Fossils

Animals that Come from Eggs

Songbirds of the Northwoods

Insects of Wisconsin  
Attracting Backyard Birds

How to be a Wildlife Rehabilitator

Wisconsin's Frogs and Toads

Animal Tracks

Black Bears

Common Loons

Human Impacts on Wildlife

Rocks and Minerals (small fee)

Hummingbirds

## On-site Educational Programming and Tours

Most of our programs can also be conducted at the Northwoods Wildlife Center. Depending on the size of the group, and time of year, groups may be broken up and other modifications made.

The education tour is one of the most popular activities at the Northwoods Wildlife Center. It's perfect for getting the family out of

the house, something to do with friends, or rounding out a day's activities. On our education tour, you will see various raptors native to Northern Wisconsin, including

a bald eagle, a great-horned owl, a goshawk, a red-tailed hawk and a broad-winged hawk. You will also

get to see a full-sized bald eagle nest, test your grip against some of the strongest grips in the animal kingdom and learn all sorts of great things about birds of prey.

## 2024 Tour Dates and Hours

May - October: Tours by appointment from 10 AM - 4PM, Tuesday - Saturdays. Depending on staff availability, tours may be arranged during the off season. A recommended donation is \$7.00 per person.

## Program and Tour Inquiries

Call: (715) 614-4094 | Email: [programs@northwoodswildlife.org](mailto:programs@northwoodswildlife.org) | Web: [northwoodswildlife.org](http://northwoodswildlife.org)

**Program Pricing:** Programming starts at \$150.00 and depends on travel time, number of animals, staff requirements and other factors.

Please consider having an alternate program in mind when calling, as program availability may be affected by the time of year, staff availability, and animal health.
